

good to know it's

Lufthansa Technik
AERO Alzey

Taylormade
For You

360° Customized

With an output of over 450 engines per year, Lufthansa Technik AERO Alzey is your highly experienced partner when it comes to operating reliable engines. No matter if you need a classical overhaul or our support in an unusual **troubleshooting** event, our engineering will find the **suitable workscope** dimension to ensure long operation times without unscheduled events. To further support you, we also take care of **warranty handling** and damage **investigations**, as well as perform on-site repairs. Our high flexibility guarantees you that all services are offered from your 1st to your 100th engine.

Additional Services

In addition to our core services which ensure your safe engine operation, Lufthansa Technik AERO Alzey offers a wide range of additional services for your convenience. We support you from finding the optimal engine **removal schedule** for your fleet to helping assess the current **market value** of your engines. For operators with larger fleets a **workscope guideline** can be established, setting standards for your engines and ensuring short turn around times. Short repair times are also achieved by **customized material management**, providing you with exchange parts from either your own customer stock or our extensive parts pool.

Expect Experience

“ Our highly motivated, internationally experienced engineers offer you the most complete service available in MRO business, supporting you from buying, operating and maintaining up to selling your engine. ”

The engine wisperer

Lufthansa Technik AERO Alzey has a dedicated engineering team for each OEM – General Electric and Pratt & Whitney Canada. Our teams consist of the perfect mixture of young and dynamic, but also knowledgeable and experienced engineers always tend to find the most efficient solution to fulfil your individual needs. Our engineers are specially trained for their assigned engine models and customers' region; almost all have work experience abroad and the awareness to address intercultural characteristics. This structure ensures a high level of experience and engine type specific knowledge for customers' satisfaction. We understand ourselves as troubleshooters delivering more than just standard repairs and overhauls. With highest precision we take care of your concerns.

Tailor-made worksopes

Our unique portfolio covering core services for every shop visit and completed by additional customized recommendations, assessments and arrangements ensures the complete spectrum required to manage your single aircraft or complete fleet. Hereby we concentrate on your technical and commercial point of departure and will develop tailor-made solutions together with you. Engineering is our dedication, which we want to share.
